

## Platform

By understanding the nuances of human behavior and decision-making, WethosAI seamlessly enhances how people think, work, and interact. With our Artificial Individual Intelligence (Aii™) we fuse behavioral science and AI to elevate individuals, groups, and organizations.

Our new Groups and Brainstorms features combine stable organizational structure with dynamic, outcome-driven workspaces—delivering a hyper-personalized platform that is customizable, intuitive, and highly impactful.

## Framework

**Mirror:** AI-powered reflection that reveals your natural behavioral patterns and tendencies, offering deeper insight into how they shape your work.

**Lens:** A clear view of team dynamics, showing how your interactions fit and flow within the specific project and broader organization.

**Flow:** Turning insights into action with AI-guided workflows and AI support to drive rocket-fueled collaboration and growth.

## Your Professional Development Toolbox

### Wethos Style

Your validated professionalism style based on dynamic AI insights that grows and adapts with you.

### XO

Our custom LLM that's personalized to you, your team, and your organization.

### Groups

The "who" of your internal org structure. Ongoing AI-powered collaboration with behavioral insights.

### Brainstorms

Outcome-driven workspaces where XO collaborates with your team to achieve specific goals.

### CalendarIQ

Optimize your time and make the most of your meetings. Be prepared, confident, and ready to connect.

### Comfort Index

Monitor comfort levels to predict and mitigate turnover risks, while also boosting employee engagement.

## Benefits

### Strengthen Team Performance & Productivity

Use AI-driven insights to optimize team composition and improve collaboration.

### Improve Engagement & Retention

Match talent to roles, reveal potential, and drive lasting team growth.

### Enhance Human Capabilities with AI

Pair AI with behavioral insight to create adaptive human-AI collaboration.

### Empower Data-Driven Leadership & Decision-Making

Empower leaders with behavioral insights to drive objectives efficiently.

## Implementation

**Privacy and Security:** Commitment to the highest data privacy and security standards.

**Seamless Integration:** Easy integration with existing systems and workflows via mobile and web.

**Scalable Solution:** Designed to accommodate organizations of any size, growing alongside businesses.

**Rapid Deployment:** Quick and easy setup process for immediate use.

**Comprehensive Training:** Extensive resources and training sessions to ensure effective utilization.

**Dedicated Support:** Access to a dedicated support group for any technical assistance or queries.

# Why WethosAI

WethosAI is a workplace optimization platform that combines behavioral science with artificial intelligence to help teams work better together. Through a foundational assessment and continuous telemetry, WethosAI uncovers your natural work styles and provides personalized coaching, group insights, and hyper-personalized predictive suggestions. The platform evolves with every interaction, guiding users, teams, and individuals in real-time to make better decisions, excel development, collaborate more effectively, and achieve sustainable performance.

## How Does it Work?

The onboarding process is easy—simply complete our scientifically validated Wethos assessment to understand your unique Wethos Style and set the foundation for your personalized AI experience. From there, your AI assistant XO provides context aware coaching and actionable insights integrating with your calendar and team cloud spaces to deliver guidance in the flow of your work, helping you prepare for meetings, resolve conflicts, and optimize collaboration.

## How is WethosAI Different from Other Tools?

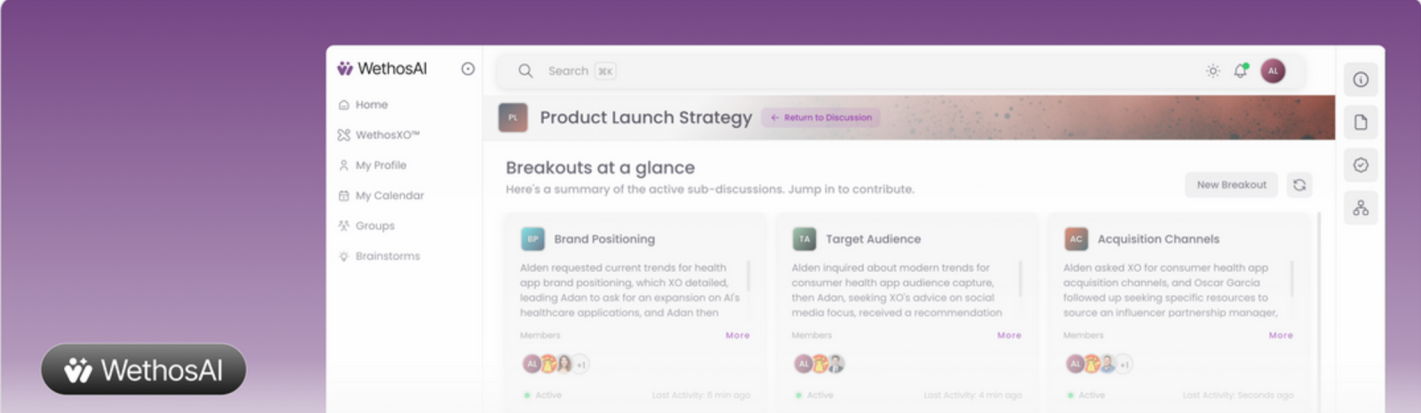

Legacy assessments offer limited one-time, static personality profiles. WethosAI goes further with dynamic, AI co-intelligence. Instead of boxing people into fixed types, it recognizes 625+ possible behavioral combinations and models how those behaviors interact in team settings. More meaningfully, WethosAI allows for growth every day. It continuously learns from workplace signals – calendar data, shared conversations, uploaded documentation, group dynamics – to deliver predictive insights and coaching that evolve with you.

## Is My Data Secure with WethosAI?

Yes. WethosAI was built by the most seasoned cybersecurity leaders in the world, and is built on enterprise-grade data security and governance. All sensitive data is encrypted at rest (AES-256) and in transit (TLS 1.3). We follow strict access controls, comply with global privacy regulations, and only store data necessary to provide value. Customers can request deletion of their data at any time, and our systems undergo regular audits to ensure compliance.

## What Results Can I Expect?

WethosAI customers report stronger trust, clearer communication, reduced conflict, and measurable performance gains across the board. By surfacing hidden strengths, aligning people with the right roles, and predicting burnout risks, companies see lower turnover, faster decision-making, and more engaged employees.

The screenshot displays the WethosAI web application interface. On the left is a purple sidebar with navigation links: Home, WethosXO™, My Profile, My Calendar, Groups, and Brainstorms. The main content area has a white background and features a search bar at the top. Below the search bar is a header for 'Product Launch Strategy' with a 'Return to Discussion' link. The main section is titled 'Breakouts at a glance' and includes a summary of active sub-discussions. Three breakout cards are visible: 'Brand Positioning' (BP), 'Target Audience' (TA), and 'Acquisition Channels' (AC). Each card shows a brief description of the discussion, a list of members with profile icons, and a 'More' link. The interface is clean and modern, with a focus on collaborative work.
